

# NOVABLADE FLUSH MOUNT

LL9PS123SK Series NovaBlade Mounting Accessories

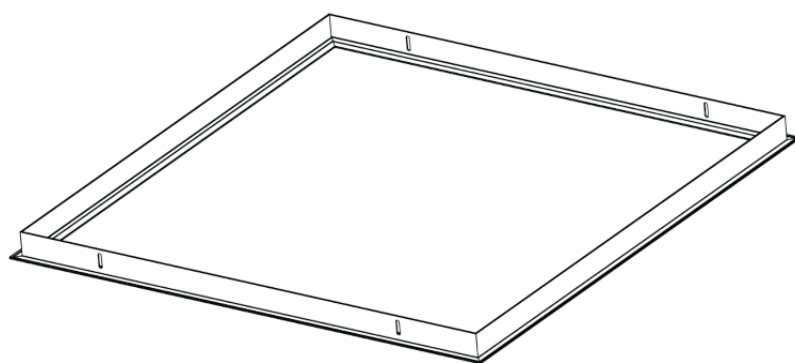

## PRODUCT OVERVIEW

Novablade products are a fantastic light source, and while the majority of applications are in a t-bar ceiling systems where they just drop into place, Novablade can do much more with the help of specialised mounting frames. The flush mount frame brings the t-bar fit into plasterboard ceilings. It's the neatest way to have great light on hand without a luminaire in sight. It fits flush with the ceiling and requires as little as 150mm clearance in the ceiling. Once installed, the Novablade just drops into place, as with a t-bar ceiling grid.

### Features at a Glance

- For flush-fitting Novablade panels into plasterboard ceilings
- Rigid aluminium frame powder-coated in matte white to suit standard ceiling colours
- Allows ease of installation of Lumex LL9P3 series panels
