

silver range

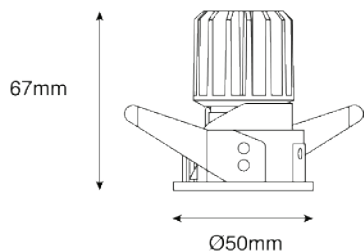

vue series

architectural lighting requires the right luminaire. highlighting and accenting with multiple sources rather than just flooding an area with light. the vue silver range features an adjustable specular aluminium reflector and a range of beam angles and washers to create the perfect effect. the range also includes a square trim and trimless options in both square and round trim. tunable white options in the silver S and silver M ranges offer the flexibility to adjust the colour temperature between 2700K and 6500K.
